BOOK SYNOPSIS

Combining the approaches of ethnomusicology and music theory, *Analytical Studies in World Music* offers fresh perspectives for thinking about how musical sounds are shaped, arranged, and composed by their diverse makers worldwide. Eleven inspired, insightful, and in-depth explanations of Iranian sung poetry, Javanese and Balinese gamelan music, Afro-Cuban drumming, flamenco, modern American chamber music, and a wealth of other genres create a border-erasing compendium of ingenious music analyses. Selections on the companion website are carefully matched with extensive transcriptions and illuminating diagrams in every chapter. Opening rich cross-cultural perspectives on music, this volume addresses the practical needs of students and scholars in the contemporary world of fusions, contact, borrowing, and curiosity about music everywhere.
